Languages: English (C2), Portuguese (Native)

Profile

Machine Learning Engineer with 3 years of experience building production LLM, RAG, and AI-agent systems end-to-end, from cloud infrastructure to user-facing product, across AWS and GCP. AWS ML Engineer – Associate certified; trained 70+ professionals across 10+ companies on applied AI.

Education & Certifications

University of Brasilia

Bachelor of Electrical Engineering (with Highest Honors)

- Ranked 1st among all graduating Electrical Engineering students

Brasilia, Brazil

Mar 2018 - Feb 2024

University of Rome Tor Vergata

International Exchange Program (ICT, Internet & Mechatronics Engineering)

- Completed master's-level coursework in Artificial Intelligence and Internet of Things (IoT)

Rome, Italy

Feb 2023 - Aug 2023

Amazon Web Services

AWS Certified Machine Learning Engineer - Associate

Verify

Feb 2026

Experience

Machine Learning Engineer

ada Learning (corporate AI upskilling / EdTech)

- Develop an EU-hosted AI-education platform with no-code agent & workflow creation, spanning infrastructure (Terraform, Docker, CI/CD), backend (Python/FastAPI), and frontend (SvelteKit)
- Build the agent-creation engine (CrewAI orchestration, LiteLLM across OpenAI/Anthropic/Bedrock, RAG via Qdrant), allowing non-technical users to build and deploy custom AI agents without code, plus MCP tool-calling and Langfuse evaluation
- Delivered AI-agent workshops to 70+ professionals representing 10+ different companies

Feb 2025 - Present

Dusseldorf, Germany

Machine Learning Engineer

Hotmart (Brazilian digital-products platform, 30M+ users)

- Developed async API using LlamaIndex, sustaining 300+ RPS of LLM, RAG, and agent traffic, enabling data scientists to run high-concurrency inference across the platform
- Load-tested the API with Locust and monitored performance in New Relic to configure a cost-efficient horizontal-scaling strategy on smaller instances
- Built MLOps CI/CD automation (Docker, Kubernetes, Terraform) that streamlined ML model deployment across AWS SageMaker, EKS, Lambda, and SQS

Aug 2024 - Jan 2025

Brasilia, Brazil

Machine Learning Engineer

snowfoxAI (AI consultancy)

- Developed document extraction pipeline for an insurance client using OCR, LLMs, and RAG, achieving 97% accuracy while reducing per-document processing time from 3 minutes to 30 seconds (deployed on AWS)
- Built retail computer vision system detecting and classifying 150+ products per image (YOLOv8, SAM), with model training on Vertex AI and scalable deployment on Google Kubernetes Engine (GKE)
- Contributed to AI solutions architecture for enterprise clients across insurance and retail, helping define AI roadmaps, project scope, and data/AI architecture

Sep 2023 - Aug 2024

Brasilia, Brazil

IoT Development Intern

GrupoOrion (IoT solutions company)

- Developed 5 IoT sensors (sound, smell, weight, people counting) and scaled to 200+ production units
- Built software tools for remote sensor testing, monitoring, and configuration using Azure IoT Hub

Mar 2021 - Dec 2022

Brasilia, Brazil

Technologies & Skills

Languages: Python, C, C++, TypeScript, SQL

GenAI & LLM: CrewAI, LlamaIndex, LiteLLM, MCP, RAG, Qdrant, Langfuse

ML & Computer Vision: PyTorch, scikit-learn, pandas, NumPy, YOLOv8, SAM, OCR (Tesseract)

Cloud: AWS (Bedrock, SageMaker, EKS, Lambda, SQS, S3, Textract), GCP (Vertex AI, GKE)

DevOps & Observability: Docker, Kubernetes, Terraform, CI/CD (GitHub Actions), pytest, Locust, New Relic

Frameworks: FastAPI, Flask, Streamlit, SvelteKit

Databases: PostgreSQL, MongoDB, DynamoDB
