DOB: 05.05.2000 | **Marital Status:** Married
Languages: English (C2), Portuguese (Native)

PROFILE

Machine Learning Engineer with 3 years of experience building production LLM, RAG, and AI agent systems across AWS and GCP, and delivering AI-automation workshops to enterprises.

EDUCATION & CERTIFICATIONS

Bachelor of Electrical Engineering (with Highest Honors) <i>University of Brasília</i> Ranked 1st among all graduating Electrical Engineering students	Mar 2018 – Feb 2024 <i>Brasília, Brazil</i>
International Exchange Program (ICT, Internet & Mechatronics Engineering) <i>University of Rome Tor Vergata</i> Completed master's-level coursework in Artificial Intelligence and Internet of Things (IoT)	Feb 2023 – Aug 2023 <i>Rome, Italy</i>
AWS Certified Machine Learning Engineer – Associate <i>Amazon Web Services</i>	Feb 2026 Verify

PROFESSIONAL EXPERIENCE

Machine Learning Engineer <i>ada Learning</i> - Developing end-to-end no-code platform for creating AI Agent workflows, handling infrastructure, backend (Python/FastAPI), and frontend (SvelteKit) - Delivered AI Agent workshops to 70+ professionals representing 10+ different companies - Building internal automation tools and managing cloud infrastructure with CI/CD pipelines	Feb 2025 – Present <i>Düsseldorf, Germany (Remote)</i>
Machine Learning Engineer <i>Hotmart</i> - Developed high-throughput async API enabling Data Scientists to interact with LLMs, RAG, and AI Agents across the platform - Built CI/CD automation tools using Docker, Kubernetes, and Terraform, significantly reducing deployment times - Conducted load testing and optimization of APIs to ensure scalability and reduce cloud infrastructure costs - Streamlined ML model deployment workflows using AWS SageMaker, EKS, Lambda, and SQS	Aug 2024 – Jan 2025 <i>Belo Horizonte, Brazil (Remote)</i>
Machine Learning Engineer <i>snowfoxAI (AI consultancy)</i> - Developed document extraction pipeline for an insurance client using OCR, LLMs, and RAG, achieving 97% accuracy while reducing per-document processing time from 3 minutes to 30 seconds (deployed on AWS) - Built retail computer vision system detecting and classifying 150+ products per image (YOLOv8, SAM), with model training on Vertex AI and scalable deployment on Google Kubernetes Engine (GKE) - Partnered with business stakeholders to define AI roadmaps, shape project scope, and design AI and data architectures	Sep 2023 – Aug 2024 <i>Brasília, Brazil (Remote)</i>
IoT Development Intern <i>Grupo Orion</i> - Developed 5 IoT sensor prototypes measuring environmental factors (sound, smell, weight, people counting) - Produced, tested, and deployed 200+ sensor units from prototype to production - Built software tools for remote sensor testing, monitoring, and configuration using Azure IoT Hub	Mar 2021 – Dec 2022 <i>Brasília, Brazil</i>

TECHNOLOGIES & SKILLS

Languages: Python, C, C++, TypeScript
AI/ML: LangChain, LlamaIndex, CrewAI, PyTorch, scikit-learn, RAG
Cloud: AWS (SageMaker, EKS, Lambda, S3), GCP (Vertex AI, GKE), Azure
DevOps: Docker, Kubernetes, Terraform
Frameworks: FastAPI, Flask, Streamlit, SvelteKit

Databases: PostgreSQL, MongoDB, DynamoDB
